

# Ice, Ice Baby

## Knowledge organiser

Key Vocabulary	
<b>season</b>	In the UK, there are four <b>seasons</b> each year. They are spring, summer, <b>autumn</b> and <b>winter</b> .
<b>autumn</b>	In <b>autumn</b> , the temperature begins to get lower and it can be quite chilly and windy. It starts to get darker earlier in the day. Some animals get ready to hibernate and some types of trees lose their leaves.
<b>winter</b>	<b>Winter</b> is the coldest <b>season</b> of the year. It can be very rainy and windy and it might even snow. Not many flowers are in bloom during <b>winter</b> and lots of trees have lost all their leaves. Some animals hibernate during <b>winter</b> and many are less active than in the warmer months.
<b>weather</b>	The <b>weather</b> includes the temperature outside, how windy it is and rainfall (how much it rains). We can also describe cloud, snow and sun.
<b>daylight</b>	<b>Daylight</b> is when it is light outside. The amount of <b>daylight</b> changes with each <b>season</b> .

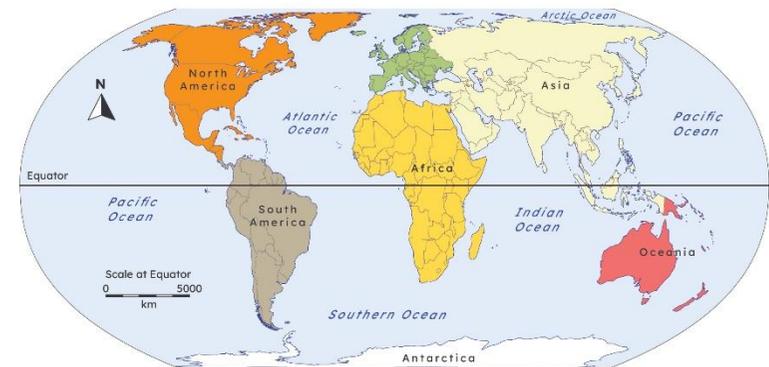

The Four <b>Seasons</b>	
<b>autumn</b>	<b>winter</b>
September	December
October	January
November	February
<b>spring</b>	<b>summer</b>
March	June
April	July
May	August
